

Folder 03: Quality Assessment (QA)

1. Scoring Logic

Each of the **117** full-text articles was evaluated against five Quality Assessment questions (QA1–QA5). A three-point scale was used for each question:

- **1.0:** The criterion is fully addressed.
- **0.5:** The criterion is partially addressed.
- **0.0:** The criterion is not addressed.

A minimum score of **3.5 out of 5.0** was required for a study to be included in the final synthesis. This ensured that only studies with clear problem formulation, technical rigor, and sound evaluation practices were analyzed.

2. QA_Scoring_Master_List.pdf

This is the main file for this folder. It contains the scores for the **110 studies** that passed. And those that were excluded, it also contains an SCV file that detailed the 110 files saved in Zotero and used for data extraction and bibliometric analysis.

3. 7 Excluded Papers with Justification

A transparent "Audit Document" that provides the specific technical justification for the **7 articles** excluded during the full-text eligibility assessment.
