

 Folder 05: Bibliometric Analysis & Visualizations

1. Overview

This folder contains the raw data, frequency tables, and technical documentation used to generate the bibliometric visualizations for the 110 primary studies included in this SLR. These analyses (Figures 2–5 in the manuscript) characterize the academic landscape, emerging thematic clusters, and the publication evolution from 2021 to 2025

2. File Descriptions

File Name	Description	Format
05_01_Bibliometric_Data_Pipeline.pdf	Technical methodology detailing workflow used for keyword mapping, and graphical representation.	PDF
05_02_Final_110_Papers_Metadata.csv	The master bibliographic file exported from Zotero . Contains verified metadata (DOIs, Titles, Publishers) for all 110 primary studies.	CSV
05_03_Analysis_Master_Data.xlsx	A multi-sheet workbook containing the frequency datasets for: - Yearly Publication Trends - Journal & Publisher Distributions	XLSX
05_04_Keyword_Thematic_Extraction.pdf	Contains the manual keyword extraction and thematic clustering (e.g., Core Domain, Architectures, Data Handling) across all 110 studies. This data bridges the raw literature with the thematic visualizations.	PDF
